PROFILE

Fourth-year ETTI student with hands-on experience in AI-assisted full-stack web development, database-backed applications and third-party integrations. Worked with React, Next.js, TypeScript, Supabase and REST APIs during university practice at MakeITFuture, alongside academic experience with Java, MySQL, Hibernate ORM and Jakarta EE. Interested in growing as a software developer through OOP, debugging, API integration and collaborative product development.

TECHNICAL SKILLS

Programming & OOP: Java, JavaScript, TypeScript, C/C++, Python; OOP fundamentals

Web Development: React, Next.js, Vite, Tailwind CSS, HTML, CSS, JSP, Servlets (Jakarta EE), REST APIs

Backend & Databases: MySQL, Supabase, PostgreSQL-based workflows, Hibernate ORM

Tools & Environments: Git/GitHub, VS Code, Eclipse IDE, Vercel, Linux/terminal basics, Arduino IDE

Development Approach: AI-assisted development, debugging, API integration, automation workflows, database-backed applications

EXPERIENCE

Software Development Intern / University Practice - [MakeITFuture](#)

Jun 2026 - Sep 2026

- Contributed to web development and automation projects using AI-assisted workflows with React/Next.js, TypeScript, Supabase and REST API integrations.
- Supported migration of application functionality from Bubble to Next.js/Supabase/Vercel, including database structure, frontend changes, integrations, testing and debugging.
- Worked on lead-generation and outreach workflows integrating Apify, Apollo.io and Unipile, with Supabase used for structured data storage.

PERSONAL PROJECTS

Recann - Lead Generation & Outreach Automation - [MakeITFuture Practice](#)

Built and refined a lead-generation workflow using Apify for LinkedIn/company data, Supabase for structured campaign/company/contact data, Apollo.io for contact enrichment and Unipile for email/LinkedIn outreach. Worked with a Next.js/Vercel dashboard and cloud-hosted AI services.

Forms for Make - Bubble to Next.js/Supabase Migration - [MakeITFuture Practice](#)

Migrated Bubble-based application functionality to a Next.js + Supabase/Vercel architecture. Worked on database structure, authentication, Row Level Security, rate limiting, Edge Function account creation, integration flows and security fixes.

UNIC GLOBAL CAR - Web Platform - [MakeITFuture Practice](#)

Migrated a React/TypeScript/Tailwind project to GitHub, Vercel and Supabase, configured deployment workflows and worked on a content-heavy blog with approximately 200 articles.

ACADEMIC PROJECTS

Database-Driven Web Application

2026

Developed a MySQL-backed web application using Java 21, Hibernate ORM, JSP and Servlets (Jakarta EE), deployed on Apache Tomcat 11; connected an HTML/CSS/JavaScript interface to backend database operations.

Laser Detection System with Automatic Calling

Built an ESP32 + SIM800L security prototype in C/C++, handling sensor input, alarm logic and GSM communication via AT commands.

EDUCATION

Bachelor's Degree - Microelectronics, Optoelectronics and Nanotechnologies - [POLITEHNICA University of Bucharest](#)

2023 - Present

Faculty of Electronics, Telecommunications and Information Technology (ETTI)

Relevant coursework: Databases, Computer Programming and Programming Languages, Signals and Systems, Electronic Devices

ADDITIONAL

Volunteering: Electronics Students League (LSE) - contributed to RoboChallenge and LAN Party organization, logistics, technical setup and participant support.

Languages: Romanian - Native | English - B2+
