

IOVA DUMITRU-ALEXANDRU

JUNIOR SOFTWARE DEVELOPER

+40 726 621 724 | iovaalex1234@gmail.com | Bucharest | LinkedIn | GitHub | Portfolio

PROFILE

Fourth-year ETTI student with hands-on experience in AI-assisted full-stack web development, database-backed applications and third-party integrations. Worked with React, Next.js, TypeScript, Supabase and REST APIs during university practice at MakeITFuture, alongside academic experience with Java, MySQL, Hibernate ORM and Jakarta EE. Interested in growing as a software developer in OOP, debugging, software lifecycle practices and collaborative product development.

TECHNICAL SKILLS

Programming & OOP: Java, JavaScript, TypeScript, C/C++, Python; OOP fundamentals

Web Development: React, Next.js, Vite, HTML, CSS, JSP, Servlets (Jakarta EE), REST APIs

Backend & Databases: MySQL, Supabase, PostgreSQL-based workflows, Hibernate ORM

Tools & Environments: Git/GitHub (basic), Eclipse IDE, VS Code, Linux/terminal basics, Arduino IDE

Development Approach: AI-assisted development, debugging, API integration, database-backed applications

EXPERIENCE

Software Development Intern / University Practice - MakeITFuture

Jun 2026 - Sep 2026

- Contributed to web development and automation projects using AI-assisted workflows, with React/Next.js, TypeScript, Supabase and REST API integrations.
- Supported migration of application functionality from Bubble to Supabase/Next.js, including database structure, frontend changes and integration work.
- Worked on lead-generation and outreach workflows integrating tools such as Apify, Apollo.io and Unipile, with Supabase used for structured data storage.
- Built and maintained frontend features in Vite/React/TypeScript projects and used GitHub repositories during development, testing and debugging.

SELECTED PROJECTS

Database-Driven Web Application - Academic Project

2026

- Developed a MySQL-backed web application with backend logic and REST APIs using Java 21, Hibernate ORM, JSP and Servlets (Jakarta EE), deployed on Apache Tomcat 11.
- Built the user interface with HTML, CSS and JavaScript and connected frontend functionality to database operations through the backend.

Laser Detection System with Automatic Calling - Academic Project

- Built an ESP32 + SIM800L security prototype in C/C++, handling sensor input, alarm logic and GSM communication via AT commands.

EDUCATION

Bachelor's Degree - Microelectronics, Optoelectronics and Nanotechnologies -

2023 - Present

POLITEHNICA University of Bucharest

Faculty of Electronics, Telecommunications and Information Technology (ETTI)

Relevant coursework: Databases, Computer Programming and Programming Languages, Signals and Systems, Electronic Devices

ADDITIONAL

Volunteering: Electronics Students League (LSE) - contributed to RoboChallenge and LAN Party organization, logistics, technical setup and participant support.

Languages: Romanian - Native | English - B2+
